Tallassee Corporate Park receives AdvantageSite designation

BIRMINGHAM, Ala., January 12– Tallassee Corporate Park has received an Alabama AdvantageSite designation.

The AdvantageSite program requires that community economic development organizations provide documentation specific to a proposed industrial site, including a set of standard data related to ownership/control, environmental and geotechnical conditions, and infrastructure status. Sites must also meet size, zoning and accessibility requirements.

“The designation of Tallassee Corporate Park as an AdvantageSite is an accomplishment we have worked toward diligently with the Tallassee Industrial Development Board,” said Barry Mask, executive director for Elmore County Economic Development Authority. “This announcement is strategic in its timing as we are currently communicating with suppliers for the upcoming GE Aviation plant in Auburn and Hyundai Heavy facility in Montgomery.”

Richard Dorley, chairman of the Tallassee Industrial Development Board said, “Highway 229 in Tallassee is already the ‘industrial corridor’ of the county with the presence of multiple international companies. Now, with the AdvantageSite designation for Tallassee Corporate Park, we will be able to attract additional new industry and jobs to one of the finest industrial parks in the state.”

“We’re very pleased to be able to announce Tallassee Corporate Park as the newest AdvantageSite,” said Greg Knighton, Economic Development Partnership of Alabama vice president and director of business information, “We commend the Elmore County/Tallassee team for pursuing the designation to further enhance the marketability of the site.”

“The AdvantageSite program and the growing list of designated sites are beginning to gain some very positive exposure. Trade publications, newspapers, and prospects are citing the merits of our program and the importance of documented sites.”

The AdvantageSite program is jointly sponsored by the Alabama Development Office, Alabama Gas Corporation, Alabama Power Company, EDPA, the North Alabama Industrial Development Association and PowerSouth Energy Cooperative.

The voluntary industrial site preparedness program was created in order to make the state more competitive for companies considering a location in Alabama.
