CCIP South Site receives AdvantageSite designation

BIRMINGHAM, Ala., May 11– A 26-acre site in Chambers County Industrial Park has received an AdvantageSite designation.

The AdvantageSite program requires that community economic development organizations provide documentation specific to a proposed industrial site, including a set of standard data related to ownership/control, environmental and geotechnical conditions, and infrastructure status.

Sites must also meet size, zoning and accessibility requirements.

"Achieving the AdvantageSite designation is a major milestone for the CCDA board and staff," stated Chambers County Development Authority Executive Director, Valerie Gray. "Our goal is to remain competitive and make the site selection process easier for clients looking at Chambers County."

CCDA Board Chairman Cary Baldwin noted, "Not only does this designation say that we have done our homework and are ready for economic development, but that our staff is dedicated to details and committed to making projects happen in Chambers County."

"Having a site that has the necessary due diligence for prospects is imperative. We are so pleased to add the Chamber County Industrial Park to the growing list of Alabama sites that have gone through this rigorous designation process," said Greg Knighton, Economic Development Partnership of Alabama vice president and director of business information.

The AdvantageSite program is jointly sponsored by the Alabama Development Office, Alabama Gas Corporation, Alabama Power Company, EDPA, the North Alabama Industrial Development Association and PowerSouth Energy Cooperative.

The voluntary industrial site preparedness program was created in order to make the state more competitive for companies considering a location in Alabama.
